PROFILE

Diploma student in Artificial Intelligence & Machine Learning, currently in 3rd year at Government Polytechnic Mumbai.

I design real-world AI systems that combine logic, data, and purpose — from tracking live satellites to analyzing Earth imagery. Passionate about solving meaningful problems, learning beyond the classroom, and building tools that leave real impact.

PROJECTS

EarthEye – Satellite Image Classifier - view

Classifies land types (urban, forest, water, barren) from satellite images using CNN. Useful for: deforestation alerts and urban planning.

Tools: TensorFlow, Streamlit, Python

OrbitView Pro – Satellite Tracker - view

Tracks real-time satellite positions and predicts ground station passes. Useful for: communication planning and mission readiness. Tools: Flask, JavaScript, Leaflet, SGP4
